Details

The antioxidant vitamin C boosts the immune system

It neutralizes free radicals, protecting the body. Vitamin C helps maintain healthy bones, teeth, gums and blood vessels.

Perine

Perine is an alkaloid, an organic alkaline compound containing nitrogen. The metabolic process that creates energy in the cells of the human body is called thermogenesis. Thermogenesis has proven to be a key factor in weight loss. Recent findings show that it plays an important role in how the body processes our daily food and nutritional needs. Thermogenesis activates the mechanisms that improve digestion, helping the body absorb nutrients more effectively.

Vitamin C in its natural form as camu camu

The camu camu fruit grows in the Amazon rain forest, mostly in swampy, flooded riverbank areas, where it is harvested from the river by boat by the local Indios. Even hundreds of years ago the fruit tree was referred to as "the tree of health"; the Indios called it a "miracle cure" and valued it highly because it gave them endurance, vitality and staying power.

The natural substances from the robustly red, plum-like camu camu fruit, otherwise known as phytochemicals, and a considerable amount of vitamin C act as aromatic stimulants when your energy levels are low.

Camu camu from the tropical rainforest is a healthy alternative to coffee, tea and other stimulants. Coffee, tea and other drinks that boost your energy contain substances that are harmful to the body like caffeine, theine and taurine.

In contrast, camu camu powder boosts your energy the natural way thanks to the stimulating effect of phytochemicals and natural vitamin C.

Recommended daily intake

1-2 caps per day before or with the meal.

Ingredients

Organic certified Camu Camu (Myrciaria dubia extract) 791 mg / capsule + 12% biological vitamin C (PE \*), piperine extract 1 mg / capsule (IN \*); Cellulose (VegeCaps).
